Amendments to the Abstract:

Please amend the Abstract as follows:

~~The invention relates to an~~An AAA (Authentication, Authorization, Accounting) server system ~~(RADSS)~~ for managing a pool of logical addresses ~~(IP1,...,IPN)~~ and a method for updating status information within the AAA server system are provided. ~~Said~~The AAA server system comprises several AAA servers. Each of the AAA servers are assigned one or more discrete partial amounts of the address pool. Status information exchanged relating to address allocation affect the discrete partial amounts of addresses. ~~The invention has the advantage of a low-complexity and efficient message exchange between the AAA servers.~~ An efficient allocation of resources to logical addresses is guaranteed as a result of changes to the assignment of partial amounts of logical addresses in AAA servers, according to need.
